

HQExoTM Exosome-Donkey Plasma exosome

Catalog: Exo-EV-A-003

PRODUCT INFORMATION

Name	HQExo TM Exosome-Donkey Plasma exosome
Cat No.	Exo-EV-A-003
Source	Exosome derived from Donkey Plasma
Product Overview	Exosomes are nanosized vesicles (30-160 nm) secreted by exocytosis by most cell types and contain specifical
	cargos, such as RNAs, lipids, and proteins. The cargos amount and composition of exosomes depend on the ce
	l type from which they are released, which making them useful for biomarker discovery and functional charact
	erization. Exosomes have been isolated from cancer cell lines (human and mouse), which helps understand tun
	or growth microenvironments. Exosome derived from enormous animal plasma to improve the studies of veter
	nary diseases. These exosomes can be used to further diagnosis and therapeutics in veterinary pre-clinical and
	clinical studies. HQExo TM standard exosomes could use as positive controls for exosome isolation and function
	al research, such as ELISA, FACS, WB. Lyophilization is useful for a long-term storage at 4°C, and frozen liq
	uid should be kept at -20°C to -80°C. Ultracentrifugation and precipitation techniques are mainly used in exoso
	me Isolation. It had been reported that both methods yielded extracellular vesicles in the size range of exosome
	s, which can be used in downstream analyses. Nanoparticles Tracking Analysis (NTA) is used for measuring e
	xosome particles concentration, and WB or ELISA can be used in exosomal biomarkers analysis. Creative Bio
	structure standard exosome products guarantee higher purity and quality to meet our customer research.
Description	Animal plasma exosome, Animal derived EV
Form	Lyophilized powder/ frozen liquid
Concentration	>1x10^6 particles
Storage	Store at -20°C or colder. Recommend to avoid repeated freeze-and-thaw cycles.
	Reconstitute lyophilized exosome by adding deionized water for a desired final concentration. Centrifuge befo
Reconstitution	e opening to ensure exosomes are at bottom, resuspend exosomes by pipetting and/or vortex, please avoid bub
	bles. Centrifuge again and mix well for using.
