

# Polycarbonate Membrane Filter (19mm, 0.4um)

Catalog: PMF-078L

## PRODUCT INFORMATION

---

<b>Name</b>	Polycarbonate Membrane Filter (19mm, 0.4um)
-------------	---

<b>Cat No.</b>	PMF-078L
----------------	----------

<b>Product Overview</b>	This polycarbonate Track Etch (PCTE) membrane is ideally suited for use as the last extrusion membrane for making 400 nm liposomes or as an intermediate membrane in a step-wise extrusion process.
	Pore size (um): 0.4
	Size (mm): 19
	Pack Size: 100

<b>Application</b>	Liposome production; Synthetic lipid
--------------------	--------------------------------------

<b>Synonyms</b>	Membrane Filter
-----------------	-----------------
