

48² Well Crystallization Plate

48 reservoir well, 96 sample drop surfaces, SBS standard micro-plate.

CAT No. CB-02

- 48 reservoir wells with 2 corresponding sample drop wells.
- Compatible with both multi-channel pipettes.
- Footprint meets microplate SBS standards for automation.
- Recommended volumes; 100 μ l for the reservoir well (maximum 200 μ l) and 1 to 2 μ l for the sample drop wells.
- Excellent optic properties and strong resistance to most of chemicals.
- Wide (1.75-3.5 mm) well walls gives excellent tape sealing properties, and makes it possible to open and re-seal a well, as shown above.
