
Mouse MSP1D1 lyophilized protein with a his-tag

Catalog: MSP-1005

PRODUCT INFORMATION

Name	Mouse MSP1D1 lyophilized protein with a his-tag
Cat No.	MSP-1005
Shortname	MSP1D1
Source	E.coli
Product Overview	Recombinant Mouse membrane scaffold protein 1D1 was expressed in E.coli with N-terminal His tag.
Purity	>90%
Species	Mouse
Tag	His
Molecular Mass	24.93kDa
Storage	Stored lyophilized powder at -20°C. The reconstituted solution should be stored at 2-8°C and should be used up in several days.
Background	Nanodiscs are a new class of model membranes that are being used to solubilize and study a range of integral membrane proteins and membrane-associated proteins. The Nanodisc bilayer is bounded by a membrane scaffold protein coat that confers enhanced stability and a narrow particle size distribution. The nanodisc assembles from a mixture of full length membrane protein in detergent, phospholipid micelles and membrane scaffold protein upon removal of the detergent.
Reconstitution	Adding double distilled watwe to prepare a stock solution of 4mg/mL. This stock solution can be diluted further as required by the differnet application protocols.
Scaffold Diameter	9-10 nm
Formulation	Lyophilized from 20mM Tris pH 7.4, 100 mM NaCl, 0.5 mM EDTA.
