

## DSPC Liposomes, Carboxyfluorescein Encapsulated

Catalog: Lipo-070RG

## PRODUCT INFORMATION

Name	DSPC Liposomes, Carboxyfluorescein Encapsulated
Cat No.	Lipo-070RG
<b>Product Overview</b>	Carboxyfluorescein is a self-quench dye and liposomes which encapsulate carboxyfluorescein can be used for full luorescent leakage assay. This liposome is made to order and delivered with no dialyzed and cleaned up. Custo mers should prepare the proper spin column for cleaning up the prep. It is advised to use the products within 30 days of the manufacturing date. Excitation/Emission (nm): 492/520 nm
<b>Lipid Composition</b>	DSPC
Form	Liquid
Storage Buffer	20 mM HEPES, pH 7.4
Concentration	Lipid Concentration 5mM
Stability	1 months
Storage	2 °C to 8 °C (do not freeze)
