

## **Eganelisib Loaded Liposomes**

Catalog: Lipo-007RG

## PRODUCT INFORMATION

Name	Eganelisib Loaded Liposomes
Cat No.	Lipo-007RG
Product Overview	Eganelisib (IPI-549) is a potent inhibitor of PI3K-? with >100-fold selectivity over other lipid and protein kina ses. The biochemical IC50 for PI3K-? is 16 nM. This product is a PEG modified pre-formulated liposome with Eganelisib (IPI-549) loaded. It is supplied ready to use in vitro or in vivo studies.
Lipid Composition	
<b>Active Ingredients</b>	Eganelisib
Form	Liquid
Storage Buffer	292 mM sucrose, 0.5% DPBS (1X)
Concentration	2.0 mg/mL (Concentration Eganelisib); Lipid Concentration 60 mM
Stability	At least 1 month
Storage	$2~^{\circ}\text{C}$ to $8~^{\circ}\text{C}$ (do not freeze), protect from light
