

Lyophilized 18:1 Diether PC Liposome

Catalog: Lipo-253RG

PRODUCT INFORMATION

Name	Lyophilized 18:1 Diether PC Liposome
Cat No.	Lipo-253RG
Product Overview	Ether lipids are a unique class of glycerophospholipids that have an alkyl chain attached to the sn-1 position by an ether bond (glycerol-ether lipids). Liposomes made from ether lipids exhibit very unique characteristics and performance. They are more stable over a wide range of acidic or alkaline pH, more stable towards degradation in oxidative conditions. Besides, they enhance the resistance against the attacks by other organism phospholipases based on the unusual stereochemistry of the glycerol backbone.
Lipid Composition	18:1 Diether PC: 1,2-di-O-(9Z-octadecenyl)-sn-glycero-3-phosphocholine(10mg/vial)
Form	Lyophilized Powder
Storage Buffer	PBS, pH 7.4 with trehalose as lyoprotectant
Concentration	Lipid Concentration 10mg/vial
Stability	6 months
Storage	-20°C
