

Placebo Control DOPC/CHOL Liposomes (100nm)

Catalog: DOPC-045L

PRODUCT INFORMATION

Name	Placebo Control DOPC/CHOL Liposomes (100nm)
-------------	---

Cat No.	DOPC-045L
----------------	-----------

Product Overview	This placebo control liposomes is made to match the lipid composition and characteristics for the non-PEGylated fluorescent liposomes. The product is sterile filtered and filled in sterile vials guaranteed to be stable for 6 months when stored in refrigerator. Lipid composition: DOPC/CHOL (55:45 mol/mol) Mean particle size: 100 nm (90-120 nm)
-------------------------	--

Lipid Composition	DOPC; CHOL
--------------------------	------------

Application	Liposome production; Synthetic lipid
--------------------	--------------------------------------
