

## HSPC/CHOL/mPEG2000-DSPE (56.2:38.5:5.3) Liposo mes with Ammonium Sulfate Gradient (100nm)

Catalog: HSPC-062L

## PRODUCT INFORMATION

Name	HSPC/CHOL/mPEG2000-DSPE (56.2:38.5:5.3) Liposomes with Ammonium Sulfate Gradient (100nm)
Cat No.	HSPC-062L
Product Overview	This lipid composition is a formulator's choice in pharmaceutical/biotech industry for both formulation feasibil ity studies and liposomal product development. HSPC is essentially equivalent to DSPC (HSPC contains about 85 % DSPC and 15% DPPC). The main advantages for using HSPC are its lower cost and availability of GMP quality raw materials. HSPC material used at Creative Biostructure is from one of the world's premier lipid su ppliers. Lipid composition: HSPC/CHOL/mPEG2000-DSPE (56.2:38.5:5.3 mol/mol)Mean particle size: 100 n m (95 - 120 nm)
Lipid Composition	HSPC; CHOL; mPEG2000-DSPE
Application	Liposome production; Synthetic lipid
