

CLIC4 Protein Crystal

Catalog: CBCRY20

PRODUCT INFORMATION

Name	CLIC4 Protein Crystal
Cat No.	CBCRY20
Fragment	Full length
Protein Description	Chloride intracellular channel 4
Background	Chloride channels are a diverse group of proteins that regulate fundamental cellular processes including stabili zation of cell membrane potential, transepithelial transport, maintenance of intracellular pH, and regulation of cell volume. Chloride intracellular channel 4 (CLIC4) protein, encoded by the CLIC4 gene, is a member of the p64 family; the gene is expressed in many tissues and exhibits a intracellular vesicular pattern in Panc-1 cells (pancreatic cancer cells).
Protein Classification	Transport protein
Structure Weight	89641.50 Da
Method	X-Ray Diffraction
Resolution	2.8Å
Reference	Li, Y.F., Li, D.F., Zeng, Z.H., Wang, D.C. (2006) Trimeric structure of the wild soluble chloride intracellular i on channel CLIC4 observed in crystals Biochem.Biophys.Res.Commun. 343: 1272-1278
