

## PNExo<sup>TM</sup> Exosome-Rhodomela

Catalog: PNE-ARH09

## PRODUCT INFORMATION

Name	PNExo <sup>TM</sup> Exosome-Rhodomela
Cat No.	PNE-ARH09
Source	Rhodomela
Product Overview	PNExo <sup>TM</sup> Exosome Series (Exosomes isolated from Algaes) are nanosized (30-150 nm) membrane vesicles e racted from Algae, rich in bioactive molecules and proteins, including Rhodophyta, Phaeophyceae, Chlorophya, and Cyanophyta. These naturally derived nanoparticles contain a variety of bioactive molecules and proteins, which have been proven to offer numerous benefits in skincare, drug delivery, and biomedicine. Algae exomes, with their antioxidant, anti-inflammatory, and anti-aging properties, have become an attractive option for the development of innovative therapies. Natural substances derived from algae are widely used as cosmetic ingredients because they provide benefits to human skin, such as anti-aging, moisturizing, whitening, regenerating, and nutritional supply. Moreover, they have the potential to deliver therapeutic compounds to target cells, which could revolutionize drug administration methods. Overall, algae-derived exosomes hold significant promise for a broad spectrum of applications in the fields of medicine and biotechnology. PNExo <sup>TM</sup> is dedicated to the production and delivery of high-quality algae-derived exosome products. PNExo <sup>TM</sup> products undergo a right rous screening and purification process to ensure their high purity and activity. We can provide both lyophilized dowder or frozen liquid according to customer requirements. lyophilized powder is beneficial for long-term torage at 4°C, while frozen liquid should be maintained at temperatures between -20°C and -80°C. Ultracentrugation and PEG precipitation have been maturely applied to exosome isolation, and we also possess TFF tecnology, mainly used for large-scale separation and production of exosomes. Creative Biostructure PNExo <sup>TM</sup> osome products guarantee higher purity and quality, and we can provide exosome GMP production and CDM. O services to meet our customers' research and production needs.
Form	Lyophilized powder / Frozen Liquid
Concentration	> 1x10^6 particles
Storage	Lyophilized powder store at 4 °C. Frozen liquid store at -20°C to -80°C. Recommended to avoid repeated free e-and-thaw cycles.
Reconstitution	Reconstitute lyophilized exosome by adding deionized water for a desired final concentration. Centrifuge before e opening to ensure exosomes are at bottom, resuspend exosomes by pipetting and/or vortex, please avoid bulbles. Centrifuge again and mix well for using.
Efficacy	Anti-inflammatory, Antioxidant, Moisturizing

45-1 Ramsey Road, Shirley, NY 11967, USA
