

# Active Squalane Liposome

Catalog: Lipo-233C

This formulation contains liposomes made of phospholipids from soy lecithin and Squalane. The liposomal delivery system protects the active ingredient making it to reach the target cells more efficiently. Squalane acts as lubricating skin conditioning agents, which gives the skin a soft, smooth appearance, as well as hair conditioning agents. Product designed to be used in cosmetic formulation in the range of 5 to 10 % respect to the final product.

## PRODUCT INFORMATION

| <b>Concentration</b>      | 20%                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Storage</b>            | Protected from light at room temperature.                                                                                                                                                                                                                                                                                                                                                                                                                            |

## USAGE GUIDELINES

|                         |                                                                                                                                                      |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General Handling</b> | Avoid excessive mixing or vortexing to prevent aggregation. Long-term storage above -80°C may result in aggregate formation. Thaw on ice before use. |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|

|                      |                                                                                                  |
|----------------------|--------------------------------------------------------------------------------------------------|
| <b>Storage</b>       | <b>Short term:</b> +2°C to +8°C (up to 1 week)<br><b>Long term:</b> -80°C (stable for 12 months) |
| <b>Stability</b>     | Stable for 12 months at -80°C. Avoid repeated freeze-thaw cycles.                                |
| <b>Freeze / Thaw</b> | Can be frozen, but limit to ?3 freeze/thaw cycles to maintain particle integrity.                |

**Important:** This product is for **research use only**. Not intended for diagnostic or therapeutic applications. Please refer to the Safety Data Sheet (SDS) for complete handling and safety information.
