

GFP-mRNA Lipid Nanoparticle (LNP), Control

Catalog: BSLNP-002Z

This product encapsulates 100µg/mL GFP mRNA in lipid nanoparticles. GFP mRNAs can be used as control of transfection efficiency. Biodistribution of LNP-mRNA and GFP mRNA expression kinetics in various organs can easily be assessed by detection of Fluorescent signal. The GFP produced has an excitation peak at 470-480 nm and emission peak at 510 nm. GFP level can be monitored by fluorescent or confocal microscopy. The average particle size of this product is ~100nm.

PRODUCT INFORMATION

Product Name	GFP-mRNA Lipid Nanoparticle (LNP), Control
Catalog Number	BSLNP-002Z
Product Overview	This product encapsulates 100µg/mL GFP mRNA in lipid nanoparticles. GFP mRNAs can be used as control of transfection efficiency. Biodistribution of LNP-mRNA and GFP mRNA expression kinetics in various organs can easily be assessed by detection of Fluorescent signal. The GFP produced has an excitation peak at 470-480 nm and emission peak at 510 nm. GFP level can be monitored by fluorescent or confocal microscopy. The average particle size of this product is ~100nm.
Form	Liquid
Storage Buffer	PBS with 5% sucrose
Concentration	The total lipid concentration is 2.5mM
Storage	Store at -80 °C

USAGE GUIDELINES

General Handling	Avoid excessive mixing or vortexing to prevent aggregation. Long-term storage above -80°C may result in aggregate formation. Thaw on ice before use.
Storage	Short term: +2°C to +8°C (up to 1 week) Long term: -80°C (stable for 12 months)
Stability	Stable for 12 months at -80°C. Avoid repeated freeze-thaw cycles.
Freeze / Thaw	Can be frozen, but limit to ?3 freeze/thaw cycles to maintain particle integrity.

Important: This product is for **research use only**. Not intended for diagnostic or therapeutic applications. Please refer to the Safety Data Sheet (SDS) for complete handling and safety information.
